GitHub Repository Link:

https://github.com/KaviduIsura/EuroSAT-Land-Use-Classification

2. Coursework 1 ZIP Submission Checklist

1. Complete source code and 8 fully executed Jupyter notebooks (Notebooks 01 to 08).
2. README.md with environment setup, commands to run, and smoke test instructions.
3. Dependency file requirements.txt.
4. Configuration YAML files in configs/ for Baseline, MLP, CNN, and CNN ablation.
5. Stratified 70/15/15 split indices in splits/split_indices.npz and train-only stats in preprocessing.json.
6. Saved model checkpoints in checkpoints/ for Baseline (.pkl), CNN (.pt), and MLP (.pt).
7. Machine-readable metrics in metrics/results.csv and detailed JSON result logs.
8. All 13 evaluation, diagnostic, and exploratory figures in figures/.
9. Permitted demonstration video link and GitHub repository URL.
10. Formal Technical Record of 1,380 words (strictly under the 1,500 word limit, excluding tables and captions).
